International application No. PCT/US04/06674	International filing date (day/month/year) 04 March 2004 (04.03.2004)	(Earliest) Priority Date (day/month/year) 23 January 2003 (23.01.2003)
Applicant INGERSOLL-RAND COMPANY		

This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 4 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

1. **Basis of the Report**

- a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

The international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, see Box No. I.

2. ☐ **Certain claims were found unsearchable** (See Box No. II)

3. ☐ **Unity of invention is lacking** (See Box No. III)

4. With regard to the **title**,

the text is approved as submitted by the applicant.

the text has been established by this Authority to read as follows:

Telescoping Drilling Sub

5. With regard to the **abstract**,

the text is approved as submitted by the applicant.

the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box No. IV. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

Box IV TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

A telescoping sub (50) for mining operations and the like. The telescoping sub (50) includes a rotor (94) portion couplable to the rotary head of a drilling rig, and a stator (74) portion that is couplable to a drill rod. The rotor (94) portion is slideably coupled to the stator (74) portion and is movable with respect thereto between an extended position and a retracted position. With the telescoping sub (50) in the retracted position, the drilling rig is operated to drill to a first depth. The drilling rig is then operated to move the rotor (94) portion to the extended position, and the drilling rig is operated to drill to a second depth that is greater then the first depth.
